

## Novel targets for skin health

We provide research funding for work on novel targets which may form the basis for new medicines in dermatological diseases

### Our aim

We are looking for novel targets and concepts in the treatment of dermatological diseases

- Targets can be proteins or nucleic acids whose function can be modulated by a small molecule or biological therapy; which have a scientific rationale in a disease of interest, but which have not been necessarily validated in that indication
- Concepts can be mechanisms, pathways, or cell players not previously linked to a disease of interest

### Our partners

- Universities
- Research Centers
- Start-ups and Biotechs
- Pharma companies

world-wide with an interest in pharmaceutical R&D

### Your benefits

- Research grants from €25000 to €100000
  - Funding to be granted at Almirall's discretion
  - Final amount will depend on the specific proposal and it may be provided in one or several installments
- Intellectual property rights with the applicant
  - You will retain ownership of any intellectual property you may bring or develop
- Additional scientific support will be provided on an ad-hoc basis
  - Mentorship by Almirall experts to advance the initial proposal to meet project criteria
  - Technology platforms to assist in your target validation
  - Pharmacological tools

- Advise for intellectual property matters
- A specific contact person to help you with any questions available at any time
- Further collaboration envisioned beyond the initial project

## Collaboration process

- Proposal submission
  - The first step is for you to create an account on the [AlmirallShare Innovation platform](#), which is a secure site to store and manage your proposals
  - The call will be opened from October 8th, 2018 to February 28<sup>th</sup>, 2019
  - Please include an outline of your idea (max. 300 words) and a detailed description of your proposal attaching documents/publications that support it
  - All the initial information provided under the proposal should be non-confidential
- Proposal evaluation and selection
  - A team of Almirall scientific experts will evaluate your proposal
  - The evaluation process will be completed 8-10 weeks after the submission deadline
  - After the evaluation period, you will receive Almirall's decision on your proposal
- Start of collaboration
  - If your proposal has been selected, the Shared Innovation team will help you with the collaboration agreement
  - An Almirall scientist will be assigned to collaborate with you on project definition as well as project follow-up

Join us in our journey  
 Almirall, Science and you
