

# Innovative therapies for skin diseases

Maximising the value of your preclinical assets to find a breakthrough therapy for patients

## Our aim

We are looking for partnering opportunities on new assets in advanced research or preclinical development stages that could be useful for the treatment of dermatological diseases.

Preferably, the assets should:

- Target immuno-inflammatory pathways or be suitable for dermato-oncological or rare dermatological indications
- Involve any therapeutic modality such as small molecules, biologics or advanced therapies
- Demonstrate strong scientific rationale, including *in vitro* and *in vivo* evidences of efficacy, if available

## Who is this for

This call is addressed to scientists affiliated to start-ups, biotechs, universities, research centres, and pharmaceutical companies all over the world.

## Collaboration framework

- Submitted proposals may be eligible for
  - An advanced research or preclinical development collaboration
  - Research grants
  - Further asset characterisation by Almirall in a pre-agreed panel of relevant cellular assays and *in vivo* models for dermatological diseases
- You will retain ownership of any intellectual property you may bring or develop
- An Almirall designated contact person will help you on answering your questions
- The potential to establish a long-term business partnership

## Collaboration process

- Proposal submission
  - The first step is for you to create an account in [AlmirallShare Innovation Platform](#) which is a secure site to store and manage your proposals
  - The submission period is from July 5<sup>th</sup>, 2021 to October 31<sup>st</sup>, 2021
  - Please include an outline of your proposal (max. 300 words) and a description of the type of asset, its biological profile, as well as its current development stage (max 3 pages)
  - All the initial information provided under the proposal should be non-confidential. In case you would like to share information under a non-disclosure agreement, please contact us at [shared.innovation@almirall.com](mailto:shared.innovation@almirall.com)

- Submissions will be handled following all applicable local compliance rules
- Proposal evaluation and selection
  - A team of Almirall's scientific experts will evaluate your proposal as soon as it is received
  - You will receive in writing our decision regarding your proposal within 8 -10 weeks after submission
  - If your proposal has been selected, a member of the AlmirallShare Team will contact you to initiate a partnership agreement that will reflect a collaborative proposal, including eventual experimental activities, and/or a business proposal according to the asset's development stage.
